

# *Pictures Are Powerful!*

When men and women come to the Hope Pregnancy Center, they are typically facing an unplanned pregnancy. Fear and uncertainty fill their minds and abortion seems to be the only answer. After all, they have been told that it's not a baby, just a mass of cells, the product of conception or fetal tissue. In order to confirm pregnancy, an ultrasound is offered and something amazing happens. On the ultrasound monitor, they see a little heart beating. They don't see a mass of cells, but a baby. Then there is the question, "Is that my baby?" And everything changes. Instead of abortion, a choice for life is made.

**That is why the Hope Pregnancy Center exists - To save and change lives!**

In order to continue this vital ministry, we need your help. Everything we do is by faith.

555 Main St.  
Anywhere, USA
